Resumé

With over a decade of experience as a Software Developer, I
specialize in Angular and Svelte, focusing on crafting software that's
not just technically sound but also easy and pleasant for users.
My work is all about combining solid coding skills with a practical
understanding of how users interact with products.

I love tackling challenging projects and value the power of teamwork.
Every project is an opportunity to grow and enhance not just our
products but also my skills and understanding of the tech landscape.

Lifelong learning is key in my journey. I'm always updating my
knowledge and skills, keeping pace with the rapid changes in
technology, and looking for ways to bring innovation into my work.

I'm open to connecting with fellow professionals and enthusiasts,
exchanging ideas, and exploring new opportunities in software
development.

Erfaring

BEUMER Group
Software Developer
september 2019 - Present (4 år 4 måneder)
Aarhus N, Midtjylland, Danmark

In my current role at Beumer Group, I am an integral part of the team
developing a sophisticated Angular-based enterprise application, with a keen
focus on functionality and user experience. My journey here also includes
temporarily assuming Scrum Master responsibilities, which enhanced my
leadership abilities and deepened my understanding of agile methodologies.

Utilizing tools like GitLab for effective version control and Jira for efficient
project management, I contribute significantly to our team's success.
Additionally, I participate in design tasks when needed, showcasing my

versatility and commitment to aesthetic and functional excellence in software development.

My role extends beyond coding; I am actively involved in a team that values innovation, efficiency, and adaptability. Committed to leveraging my skills for impactful solutions, I continuously seek opportunities to refine our processes and deliver exceptional results in the dynamic field of software development.

RadioAnalyzer
8 måneder

UX Designer
december 2018 - februar 2019 (3 måneder)
Aalborg, Nordjylland, Danmark

Building upon the valuable experience gained during my internship, I was delighted to join RadioAnalyzer as a full-time employee. In this role, I continue to apply and expand my skills in UI/UX design, contributing to more complex and impactful projects. My responsibilities have grown to include deeper involvement in the creative process, from initial concept development to final implementation, ensuring a seamless user experience across our platform.

In this capacity, I work closely with a diverse team of developers and designers, contributing to innovative design solutions that align with our users' needs and the company's vision. My journey at RadioAnalyzer has been a testament to the importance of effective UI/UX in the digital landscape, driving user satisfaction and business success.

UX Designer & Developer
juli 2018 - december 2018 (6 måneder)
Aalborg, Nordjylland, Danmark

During my internship at RadioAnalyzer, I played a key role in the user interface design process. My responsibilities included creating mockups for various features using Adobe XD, where I honed my ability to visualize and craft user-friendly interfaces. Following the design phase, I was actively involved in implementing these designs into the platform, transforming conceptual ideas into functional and aesthetically pleasing user experiences.

Collaborating closely with the development team, I ensured that the design consistency and usability were maintained across the platform. This role was a significant learning experience for me, enhancing my skills in Adobe XD and providing practical insights into the impact of effective design on user

engagement and satisfaction. My time at RadioAnalyzer was instrumental in developing a comprehensive understanding of the UI/UX design process, from initial concept creation to final implementation.

Co3 webbureau
Frontend Developer
september 2016 - februar 2017 (6 måneder)
Ikast, Denmark

In my initial professional role at Co3 as a Frontend Developer, I quickly adapted to the fast-paced world of web technology, focusing on HTML5, CSS3, JavaScript (jQuery), and Razor within the CMS DynamicWeb. My responsibilities included developing and implementing systems tailored for business applications and engaging directly with clients to provide solutions that met their specific needs. My experience in using DynamicWeb CMS was particularly instrumental in crafting scalable and versatile web applications.

Though my time at Co3 was brief, it was rich in learning and professional development. This role not only enhanced my technical skills in frontend development but also provided valuable insights into client interactions and project delivery in the tech industry.

Dansk Supermarked Group
Frontend Developer
august 2015 - december 2015 (5 måneder)
Højbjerg, Denmark

During my academic pursuit in web development, I had the privilege of undertaking my internship at Dansk Supermarked Group, where I delved deeply into the practical aspects of web technologies. In this role, my focus was on:

Crafting web solutions using HTML5, CSS3, and JavaScript, I honed my skills in creating user-friendly and visually appealing websites. My experience with the Umbraco CMS was particularly enriching, as it allowed me to explore the intricacies of content management systems and their role in web development.

A significant part of my internship was dedicated to understanding and improving web performance. This involved analyzing and optimizing website functionalities to ensure efficient load times and a smooth user experience. This hands-on experience provided me with a comprehensive understanding of the technicalities involved in building high-performing web applications.

This internship at Dansk Supermarked Group was a cornerstone experience, cementing my foundation in web development and preparing me for a successful career in this dynamic field.

IT Minds
Frontend Developer
februar 2014 - juni 2014 (5 måneder)
Katrinebjergvej 93b, 8200 Aarhus N, Denmark

My educational path as a multimedia designer led me to a rewarding 5-month internship at IT Minds. There, I immersed myself in the practical world of frontend technologies. My focus at IT Minds was on:

Engaging deeply with HTML5, CSS3, and JavaScript, I developed a robust foundation in creating interactive and visually compelling web designs. This experience was not just about coding; it involved integrating design principles to forge user-centric digital experiences.

This hands-on approach at IT Minds allowed me to seamlessly blend technical skills with creative design, honing my ability to deliver digital solutions that were functional, aesthetically pleasing, and intuitive for users.
